

1 Simple dirtree

This is a simple dirtree:

```
MyProject
├── build
├── subfolder
│   ├── subsubfolder
│   ├── subsubfolder
│   └── subsubfolder
```

2 dirtree in figure

Figure 1 shows a simple dirtree in a figure environment. Don't forget to use `make command` to use `ref{}`

```
MyProject
├── build
├── subfolder
│   ├── subsubfolder
│   ├── subsubfolder
│   └── subsubfolder
```

Figure 1: Simple dirtree in figure-environment

3 dirtree with Colors and Icons

The figure 2 shows a dirtree with colored items.

```
📁 MyProject
├── 📁 build
├── 📄 CMakeLists.txt
├── 📄 main.c
├── 📄 myServer.h
└── 📄 myServer.c
```

Figure 2: Structure with icons and colored structures
